CATALOGUE 2023

PACKAGING SOLUTIONS MADE OF PLASTICS

WHITE & RED CASES

SEE PAGES 40 + 41 IN CHAPTER 5

Dear customers

we are pleased to present you our packaging catalogue.

Here is some important information at a glance:

- You can find the current **price list 2023** for the packaging catalogue 2023 as a PDF for download on our homepage at www.licefa.de (with our general terms of business).

- We have revised **chapter 3 "Membrane boxes"** (pages 19 to 22) in order to emphasise the advantages of membrane foil especially for the packaging of sensitive parts even more specifically, among other things with a movie that you can download by QR.

- We would also like to recommend **chapter 5 "Suitcases"** and in particular our **"White & Red Cases"** series (pages 40 to 41). Due to their diversity and special colour design, these series are becoming increasingly popular.

Heinrich Horstmann

In addition, you can expect a **wide standard range of durable and sustainable products** in this packaging catalogue, paired with diverse manufacturing options for **individual packaging solutions.**

We look forward to working with you!

Best regards from Bad Salzuflen

TERMS AND STANDARDS

ESD. is the electrostatic discharge as potential equalization between loaded bodies by direct contact or flashover.

Standards
DIN EN 61340-5-1. Electrostatics – Part 5:1: Protection of electronic components against electrostatic phenomenons – general requirements.

conductive material

Conductive materials. If the surface resistivity is larger 10^2 Ohm and smaller 10^5 Ohm (according to DIN EN 61340-5-1).

dissipative material

Dissipative materials. If the surface resistivity is larger 10^5 Ohm and smaller 10^{11} (according to DIN EN 61340-5-1).
